Hi Scott,

Attached is the Arkwood GW Remediation Summary report. Please send any ORD comments by end of this month, we're planning to schedule the PRP's requested meeting for July and this will be one of the topics.

The main questions to be answered are:

1) Is the Arkwood gw remediation working toward achieving the gw remedial action objective?

*with the injection of ozonated water

*with the injection of non-ozonated water

*without the injection of either

2) Does EPA agree with the PRP's conclusions and recommendations? All, partial, why or why not?

3) Any other comments concerning PRP's current implementation, ADEQ's five year review comments, ADEQ standards, or the gw RAO.

Thanks,

Stephen L. Tzhone

Groundwater Remediation Summary - 6-4-12.pdf

Stephen,

As requested, please see the attached summary of groundwater remediation at the Arkwood Site. Please note that Dianna Kilburn of ADEQ is copied on this email. Feel free to call me with any questions or additional information.

Jean
